PEBBLES

WHITE PEBBEL

The river stone, which is known as Pebble in English, is produced with natural colors in different sizes by state of the art machinery with a simulated method in a natural and uniform state with a smooth surface.

BLACK PEBBLE STONE

The advantages of using River Stone includes high durability, compatibility with different weather conditions and no need for repair as well as easy maintenance conditions. Pebble can be used in landscaping, roof gardening, home and villa decoration and many other places in construction and non-construction projects.
